FROM WHENUA TO WELLNESS

Prescriber information only — not for patient distribution. Clinical profile, class and matrix ratings are guidance based on cannabinoid and dominant-terpene content, not clinical indications or evidence of efficacy. THC/CBD are nominal label claims; terpene values are batch-specific — refer to the current Certificate of Analysis. Terpene swatch colours correspond to the Aho terpene wheel. High-THC products should be initiated cautiously in cannabis-naïve patients; evidence for medicinal cannabis remains condition-specific and patient response may vary.
